Professional Summary

Software Engineer at Novigo Solutions specializing in Robotic Process Automation (RPA) and Agentic Automation. Experienced in designing scalable, AI-driven automation solutions and Proof-of-Concepts (POCs) using **UiPath** products, delivering measurable value to clients. Leading the Agentic Automation Center of Excellence and actively contributing solutions to the UiPath Community.

Experience

Novigo Solutions Pvt. Ltd. <i>Software Engineer (Automation Developer)</i>	Jun 2024 – Present
Abdul Latif Jameel Motors (ALJM), Saudi Arabia	
<ul style="list-style-type: none">Designed and deployed UiPath-based automation in the Finance department, reducing manual effort from 40 man-hours/day to 6 bot-hours/day.Implemented change requests, enhancements, and bug fixes with UAT and hypercare support, ensuring seamless production rollouts.	
Agentic CoE	
<ul style="list-style-type: none">Developed and presented multiple Agentic Automation Proof-of-Concept as part of the CoE initiative, featuring Invoice-to-PO matching and discrepancy resolution using UiPath's Agent Builder orchestrated via UiPath Maestro. Showcased the solution live on LinkedIn and YouTube in the presence of UiPath Sales representatives.Developed an end-to-end Agentic Consultation Management process that was presented at GITEX 2025 at the UiPath-Novigo Booth to garner healthcare client prospects.Supported the automation team of a major Airways client in building an internal POC demonstrating UiPath Agents and UiPath GenAI by automating the categorization of support mail, generating strong client interest in Agentic Automation.	
Proof Of Concepts (POCs)	
<ul style="list-style-type: none">Built an end-to-end automation POC using UiPath's Computer Vision for patient data retrieval in the healthcare domain. Implemented 3-tier nested virtual machine automation entirely with in-house Computer Vision workflows, securing a potential customer for Novigo Solutions.Contributed to a software test automation POC using UiPath's Test Suite for a banking website. Automated a login-to-logout flow, including beneficiary page validation and debit transaction testing.	

Other Contributions

<ul style="list-style-type: none">Runner-up, Novigo GenAI Hackathon: Led a 4-member team to build a GenAI-based email management system using MERN stack, integrated with Outlook, Graph API, and OpenAI API. Oversaw GPT-4o-mini model training/integration and team coordination.Led a healthcare automation project for UiPath's AgentHack, leveraging UiPath's Agentic Capabilities to streamline the appointment booking-to-consultation process. Published resources on UiPath's Community Forum.Conducted internal trainings on UiPath products, upskilling automation team members from freshers to senior developers.Delivered 70+ solutions on UiPath's Community Forum, earning Monthly Forum Rewards five consecutive times (and counting).Manage NoviBand, organizing bi-weekly music events to boost team morale.
