VINEETH SHENOY P

Senior Software Engineer - Agentic AI Consultant

vineethshenoy22@gmail.com — +91 9449559975 — vineeth-shenoy-p — Portfolio

Professional Summary

UiPath MVP 2026 (Agentic Automation) and Senior Software Engineer at Novigo Solutions, building production-grade agentic AI platforms with **LangGraph**, **UiPath Maestro BPMN**, and **Gemini**. Delivered governed multi-agent systems, full-stack backends (**GCP**, **FastAPI**, **React 18**, **PostgreSQL**), and enterprise automation pipelines with measurable ROI. Responsible AI practitioner using **Claude Code** with CLAUDE.md governance; holder of **4 UiPath certifications** and active UiPath Community contributor.

Experience

Novigo Solutions Pvt. Ltd. · *Senior Software Engineer (Agentic AI Consultant)* **Jun 2024 – Present**

APStudio — AP Invoice Automation Platform

- Architected **APStudio** on **GCP** (**Python**, **FastAPI**, **React 18/TypeScript**, **PostgreSQL**, **Prefect**) with an **Azure Document Intelligence** extraction pipeline and **SQLAlchemy 2.x** ORM over **75+ SAP tables** for end-to-end AP invoice processing; **Claude Code** enforced team-wide coding conventions and commit hygiene.
- Built a **14-point master-data validation engine**: 4-tier vendor resolution (VAT ID → IBAN → fuzzy name), reversal-aware **duplicate detection**, and tax validation (T007A, 2%/10% tolerance bands) against live SAP tables.
- Designed a **governed LLM layer**: 13+ **Gemini** agents behind a **guardrail kernel** (PII vault tokenisation, budget/kill-switch, audit tracing); achieved **$0.0012/invoice** LLM cost and **95% straight-through processing**, with HITL exception handling for the remaining 5%.

Call Center Analytics — UiPath Hackathon 2026 (Agentic Automation)

- Built a governed call-center analytics platform on **UiPath**: **Maestro BPMN** orchestration, **Coded Agents**, **Data Fabric** system of record, **Action Center** HITL, and a **React 18/TypeScript Coded App** — turning raw call audio into a supervisor-reviewed **43-field CallReport** with an **Agent Builder** conversational assistant over live data; entire platform shipped at hackathon pace via **Claude Code**-driven development.
- Engineered an on-prem **LangGraph** perception pipeline (**faster-whisper** ASR, **pyannote** diarization, **wav2vec2** emotion, **Ollama** LLMs) for 8-rule compliance judging, fraud-risk scoring, and PII masking.

Self-Service BI Platform — AP/DPO Analytics

- Built a conversational AP analytics platform (**Python**, **FastAPI**, **React**, **PostgreSQL**, **Qdrant**) with a **7-agent LangGraph pipeline** (Classifier → SQL Executor → Decomposition → Root Cause → Synthesizer) and **4-tier SQL resolution** (MV routing → template → **Qdrant RAG** → LLM fallback); team workflow standardised via **Claude Code** (CLAUDE.md, pytest hooks, commit hygiene).
- Implemented **L0–L4 DPO decomposition engine** with **15+ root cause detectors** (RC01–RC15), and **React SSE** frontend with animated decomposition tree and per-vendor RC fan-out.

Vendor Finance & Claims Automation Suite — UiPath RPA & Document Intelligence

- **Vendor Payment Notification:** Reduced Finance manual effort from **40 Man Hours/day to 6 Bot Hours** via **UiPath**; **Warranty Reconciliation & Posting:** Automated monthly report creation from **1 hour to 3 minutes** — both delivered with full UAT & Hypercare.
- Built an **Azure Custom Classification Model** + **17 extraction models** for 17 vendor invoice templates, and an **L2 page-range classifier** for multi-invoice PDFs — reducing monthly manual effort from **50+ hours to 6 minutes** (standard) / under **1 hour** (high-volume).

Education

St. Joseph Engineering College, Mangalore, India
*B.E. in Artificial Intelligence & Machine Learning (CGPA: **8.65**/10)* *Nov. 2020 – June 2024*

St Aloysius P.U. College, Mangalore, India
*Grade 12 (Percentage: **93.33**%)* *Jun. 2018 – Mar. 2020*

Skills

Automation	UiPath Automation, UiPath Maestro, UiPath Agents, UiPath Data Fabric, UiPath Agent Builder, UiPath Action Center
Languages & Frameworks	Python, FastAPI, React 18, TypeScript, SQLAlchemy, LangChain, LangGraph, Prefect, RapidFuzz, C#.NET, VB.NET, JavaScript, C++, Java
Cloud, APIs & Tools	GCP (Cloud SQL, Cloud Run), Microsoft Azure, Azure Document Intelligence, Gemini API, OpenAI API, Qdrant, Ollama, Graph API, PostgreSQL, VS Code, UiPath Studio, Claude Code
Soft Skills	Client Interaction, Analytical Thinking, Agile Work Practices, Presentation Skills, Time Management

Certifications

UiPath	Automation Developer Professional (ADPv1) | Agentic Automation Professional (AAPv1) | Specialized AI Associate (SAIAv1) | Agentic Automation Associate (AAAv1)
