VINEETH SHENOY P

Senior Software Engineer - Agentic AI Consultant

vineethshenoy22@gmail.com — +91 9449559975 — vineeth-shenoy-p — Portfolio

Professional Summary

Senior Software Engineer and Agentic AI Consultant specializing in enterprise AI, intelligent automation, and solution architecture. Technical lead for a 3-engineer team, driving architecture, backend, orchestration, SAP integration, and production delivery for enterprise AP automation. Experienced across **AI/agentic systems, backend engineering, data platforms, enterprise integration, and automation**, building governed AI workflows and multi-agent systems, plus POCs, customer demos, and **AI-assisted development with Claude**.

Experience

Novigo Solutions Pvt. Ltd. · *Senior Software Engineer (Agentic AI Consultant)* **Jun 2024 – Present**

VIM on UiPath Maestro — Agentic AP Invoice Processing Platform

- Built an end-to-end AP invoice platform on **UiPath Maestro** (email intake + **7-stage case**, per-invoice parallel subflows at **1 Platform Unit per email**), cutting robot time per invoice from ∼**10h 51m to** ∼**7 min (**∼**99%)**.
- Engineered **GenAI email classification** splitting multi-invoice emails page by page, with a code validator, rules table, and self-correcting retry; a second GenAI pass recovers missing PO numbers only when backed by a verified email quote.
- Integrated **IXP extraction with Action Center Validation Station**, **2 UiPath agents** (vendor KYC; VAT/SCB codes), a **React/TypeScript Coded Action App**, and an SAP posting robot, running alongside Production with zero data-model changes.

NoviStudio — SAP-Integrated AP Invoice Automation Platform

- Acted as **technical lead for a 3-engineer team**, owning backend, workflow orchestration, SAP integration, frontend, architectural decisions, code reviews, and production database releases; authored engineering governance for human and AI contributors.
- Led the re-architecture from PostgreSQL to **Snowflake as the single system of record**
- Engineered Snowflake-native processing with **17 stored procedures, 11 Tasks, and 3 Streams**; designed **21 governed LLM agents** on **Snowflake Cortex** behind a unified guardrail kernel with PII tokenisation, budget controls, kill-switches, and audit trails.
- **Presented the NoviStudio solution to 20+ enterprise customers across the Middle East** alongside the Marketing and Pre-Sales teams, translating the technical solution into customer-facing demonstrations and solution discussions.

Call Center Analytics

- Built a governed call-center analytics platform using **UiPath Maestro BPMN, Coded Agents, Data Fabric, Action Center HITL**, and a **React 18/TypeScript Coded App**, turning call audio into supervisor-reviewed **43-field CallReports** with a conversational assistant.
- Engineered an on-prem **LangGraph** perception pipeline using **faster-whisper, pyannote, wav2vec2, and Ollama** for transcription, speaker diarization, emotion analysis, compliance evaluation, fraud-risk scoring, and PII masking.

Self-Service BI Platform — AP/DPO Analytics

- Built a conversational AP analytics platform using **Python, FastAPI, React, PostgreSQL, and Qdrant**, with a **7-agent LangGraph pipeline** covering classification, SQL execution, decomposition, root-cause analysis, and synthesis.
- Implemented an **L0–L4 DPO decomposition engine** with **15+ root-cause detectors** and a React SSE interface with animated decomposition trees and per-vendor root-cause analysis.

Vendor Finance & Claims Automation Suite — UiPath RPA & Document Intelligence

- Reduced Finance manual effort for **Vendor Payment Notification** from **40 man-hours/day to 6 bot-hours/day** using UiPath; automated **Warranty Reconciliation & Posting** report generation from **1 hour to 3 minutes**, with full UAT and Hypercare.
- Built an **Azure Custom Classification Model** with **17 extraction models** and an L2 page-range classifier for multi-invoice PDFs, cutting monthly manual effort from **50+ hours to 6 minutes**.

Education

St. Joseph Engineering College, Mangalore, India
*B.E. in Artificial Intelligence & Machine Learning (CGPA: **8.57**/10)* *Nov. 2020 – June 2024*

St Aloysius P.U. College, Mangalore, India
*Grade 12 (Percentage: **93.33**%)* *Jun. 2018 – Mar. 2020*

Skills

AI & Agentic Systems	LLMs, RAG, Multi-Agent Systems, LangGraph, LangChain, Snowflake Cortex, OpenAI/Gemini APIs, Ollama
Software Engineering	Python, FastAPI, React 18, TypeScript, SQL, SQLAlchemy, Pydantic, Prefect, C#.NET, VB.NET, JavaScript
Data & Cloud	Snowflake, PostgreSQL, Qdrant, Azure Document Intelligence, GCP, Graph API
Enterprise Automation	UiPath Maestro, Agents, Agent Builder, IXP, Data Fabric, Action Center, SAP Integration
Engineering Tools	Claude Code, Git, Terraform, pytest, VS Code

Certifications

UiPath	Automation Developer Professional (ADPv1) | Agentic Automation Professional (AAPv1) Specialized AI Associate (SAIAv1) | Agentic Automation Associate (AAAv1)
